

KNOWLEDGE **THAT INNOVATES**

COMPANY PROFILE

60 YEARS OF CONSULTING

PTSCLAS stems from the desire to combine different consulting realities between them, with the ambition to consolidate its placement among the large Italian enterprises in the consulting sector. Our innovative proposal is condensed into an integrated offer built over 60 years of history and which allows us today to follow the projects from the strategic phase to their implementation.

The integration of different skills, the experience gained in the areas of **Advisory, Data Intelligence, Management Solution for SMEs, EU Fund Assistance, Human Capital, Media and Technology Telecommunications** combined with a strong positioning in relevant sectors, permits us to address an increasingly demanding market, allowing us to read in a targeted manner some of the areas evolving the most.
